

# VEDANT CHARDE

Wardha, Maharashtra | +91 [92849 68520](tel:9284968520) | [chardevedant67@gmail.com](mailto:chardevedant67@gmail.com) | [LinkedIn](#)

## SUMMARY

A results-driven BCA fresher with hands-on experience in automation engineering, lead generation, web development, and AI prompt design. Currently interning at CosmoGeek Software Solutions building automation workflows and lead generation pipelines; previously built production-grade n8n automation pipelines, lead qualification systems, and data scraping workflows during a 4-month internship at Leadkwik. Co-authored a research paper accepted at an international Springer-indexed conference. Passionate about building smart, scalable solutions at the intersection of AI and backend technology.

## TECHNICAL SKILLS

**Automation & Workflow:** n8n, New Workflow Design, Email Automation, Lead Generation & Qualification Pipelines, B2B Onboarding Flows

**Web Development:** HTML, CSS, JavaScript, React, REST APIs

**Programming:** Python (scripting, data scraping), JavaScript, React

**Cloud & Database:** Google Cloud Platform (GCP), NoSQL

**Tools & Platforms:** Hostinger Mail, AI Prompt Engineering, Git, REST APIs

## INTERNSHIP

### Automation Intern

Jul 2026 – Present

**CosmoGeek Software Solutions** | Work From Office

- Designing and building **new automation workflows** to streamline internal business processes and reduce manual effort
- Working on **lead generation pipelines** to identify, capture, and qualify prospective clients
- Contributing to **web development** tasks, building and maintaining features for client-facing web applications
- Collaborating with the team to integrate automation tools into existing **web workflows** for improved efficiency

### Growth & Automation Intern

Jan 2025 – May 2025

**Leadkwik** | Remote | 4 months

- Built end-to-end **n8n automation workflows** for B2B lead capture, email verification, and client onboarding — reducing manual follow-up effort significantly
- Designed and executed **targeted email campaigns** using Hostinger Mail, improving outreach engagement and lead conversion rates
- Wrote Python scraping scripts to **collect and clean prospect data** from online sources, feeding accurate leads directly into the automation pipeline
- Engineered **AI prompt templates** for marketing and outreach tasks, producing structured, consistent outputs at scale
- Set up automated reply flows routing inbound B2B leads through **qualification logic** before handoff to the sales team

## PROJECTS

### n8n Lead Automation System

2026

*Tech Stack: n8n · Python · Email APIs*

- Designed a self-navigating data pipeline that scrapes prospect data, verifies emails, and **auto-onboards qualified B2B leads** without manual intervention
- Integrated decision-tree logic to qualify leads and trigger personalised reply sequences based on client profile and behaviour

### RoomDekhoo.in — No-Broker Room Finder

2025

*Tech Stack: Python · React · GCP · NoSQL*

- Developed the **backend dashboard interface** for a location-based product that connects users to nearby rooms — no broker fees involved
- I worked across the full stack — Python backend, React frontend, GCP for cloud hosting, and NoSQL for flexible, scalable data storage

## ACHIEVEMENT

### Research Paper Accepted — ICCCNNet 2026 (Springer)

2026

- Co-authored "**Text-Based Mental Health Detection**" accepted at the International Conference on Computing and Communication Networks 2026
- Paper to be published in **Springer's Lecture Notes in Networks and Systems** — indexed in SCOPUS, INSPEC, and Web of Science
- Ranked in the **top 15%** of all submissions reviewed at the conference

## EDUCATION

### Bachelor of Computer Applications (BCA)

Aug 2023 – May 2026

**Datta Meghe Institute of Higher Education and Research** | Wardha, Maharashtra
